SFC: Treasury Operations | Security Alliance — Security Checklist

Governance, access control, transaction verification, DeFi/staking risk, operational security, monitoring, vendor risk, and accounting.

Org: _____
Owner: _____
Date: _____

1. Governance & Treasury Architecture

- [ ] **Treasury Operations Owner**
  Is there a clearly designated person or team accountable for treasury operations?
- [ ] **Treasury Registry and Documentation**
  Do you maintain a complete, current record of all treasury wallets, accounts, and their configurations?
- [ ] **Custody Architecture Rationale**
  Do you have documented rationale for your treasury custody architecture?
- [ ] **Treasury Infrastructure Change Management**
  Do you have change management procedures for treasury infrastructure modifications?

Notes: _____

2. Risk Classification & Fund Allocation

- [ ] **Treasury Wallet Risk Classification**
  Do you classify your treasury wallets and accounts by risk level and assign security controls accordingly?
- [ ] **Fund Allocation Limits and Rebalancing**
  Do you enforce fund allocation limits and rebalancing triggers across your treasury?

Notes: _____

3. Access Control & Platform Security

- [ ] **Custody Platform Security Configuration**
  Do you configure and maintain security controls on your custody platforms?
- [ ] **Credential and Secret Management**
  Do you securely manage all credentials and secrets used in treasury operations?
- [ ] **Access Reviews for Treasury Systems**
  Do you periodically review who has access to treasury systems?
- [ ] **Personnel Operational Security**
  Do you enforce operational security requirements for treasury personnel?

Notes: _____

4. Transaction Security

- [ ] **Transaction Verification and Execution**
  Do you have a defined process for verifying and executing treasury transactions?
- [ ] **Signer and Approver Knowledge**
  Are treasury signers and approvers knowledgeable in the security practices relevant to their role?
- [ ] **Secure Communication Procedures**
  Do you have secure communication procedures for treasury operations, including standard identity verification?

Notes: _____

5. Protocol Deployments

- [ ] **Protocol Evaluation and Exposure Limits**
  Do you evaluate external protocols and enforce exposure limits before deploying treasury funds?
- [ ] **Position Lifecycle Management**
  Do you have procedures for managing the lifecycle of your positions in external protocols?

Notes: _____

6. Monitoring & Incident Response

- [ ] **Monitoring and Threat Awareness**
  Do you monitor your treasury for anomalous activity, external threats, and operational risks?
- [ ] **Incident Response Plan**
  Do you have an incident response plan for treasury security events, and do you test it?

Notes: _____

7. Vendor & Infrastructure

- [ ] **Vendor Security Management**
  Do you evaluate and monitor the security of third-party services used in treasury operations?
- [ ] **Backup Infrastructure and Alternate Access**
  Do you have backup infrastructure and alternate access methods for treasury operations?

Notes: _____

8. Accounting & Reporting

- [ ] **Financial Recordkeeping and Reconciliation**
  Do you maintain accurate treasury records and conduct periodic reconciliation?
- [ ] **Insurance Coverage**
  Do you maintain insurance coverage appropriate for your treasury operations?
