SFC: Workspace Security | Security Alliance — Security Checklist

Access management, device security, network controls, and data protection.

Org: _____
Owner: _____
Date: _____

1. Governance & Inventory

- [ ] **Workspace Security Owner**
  Is there a clearly designated person or team accountable for workspace security?
- [ ] **Workspace Security Policy**
  Do you maintain a workspace security policy that is accessible and understood by all personnel?
- [ ] **Asset Inventory**
  Do you maintain an inventory of organizational devices and accounts with defined ownership?
- [ ] **System and Data Classification**
  Do you classify systems and data by sensitivity to determine appropriate security controls?

Notes: _____

2. Device Security

- [ ] **Device Security Standards**
  Do you define and enforce security standards for organizational devices?
- [ ] **Device Lifecycle Management**
  Do you have procedures for device loss, theft, and secure decommissioning?
- [ ] **Endpoint Protection**
  Do you deploy and monitor endpoint protection on organizational devices?
- [ ] **Physical and Travel Security**
  Do you maintain physical security requirements for workspaces and travel?

Notes: _____

3. Account, Access & Credential Management

- [ ] **Account Lifecycle Management**
  Do you have procedures for provisioning, modifying, and revoking user accounts?
- [ ] **Multi-Factor Authentication**
  Do you enforce multi-factor authentication across organizational accounts?
- [ ] **Organizational Account Security**
  Do you maintain security standards for all organizational accounts, including enterprise platforms and external services?
- [ ] **Credential Management Standards**
  Do you enforce credential management standards, including secure storage and individual accountability?
- [ ] **Access Reviews**
  Do you conduct periodic access reviews and promptly adjust permissions when roles change?

Notes: _____

4. Software & Application Security

- [ ] **Software Evaluation and Approval**
  Do you evaluate and approve software, extensions, and tools before organizational use?
- [ ] **Source Code and Repository Security**
  Do you secure source code repositories against unauthorized access and credential exposure?

Notes: _____

5. Network & Communication

- [ ] **Network Security**
  Do you enforce secure network access for organizational systems?
- [ ] **Secure Communications**
  Do you secure organizational communications and verify identity for sensitive interactions?

Notes: _____

6. People & Training

- [ ] **Security Onboarding**
  Do you verify employee identity and provide security onboarding before granting system access?
- [ ] **Security Offboarding**
  Do you have comprehensive offboarding procedures for departing personnel?
- [ ] **Security Awareness and Training**
  Do you maintain a security awareness program with regular training and testing?

Notes: _____

7. Monitoring & Risk Management

- [ ] **Workspace Security Monitoring and Incident Response**
  Do you detect and respond to workspace security incidents?
- [ ] **Insider Threat Assessment**
  Do you assess insider threat risks and enforce least-privilege access for each role?
- [ ] **Third-Party Access Management**
  Do you manage third-party access with time-limited, purpose-specific permissions?
